DuPage Teachers Attend a Water Conservation and DWC LEEDS and Tour at DuPage Water Commission

Date: March 1, 2013

On March 1, 2013, School & Community Assistance for Recycling & Composting Education (SCARCE) arranged for 20 DuPage teachers to attend a LEEDS and water conservation presentation.

Manager of Operations Terry McGhee presented the teachers with a background on the Commission’s Leadership in Energy and Environmental Design (LEED) certified building and how the Commission decided to build the LEED certified building. Water Conservation Coordinator Jenessa Rodriguez presented the four programs from the Water Conservation and Protection Program (WCAPP) to the teachers, which included: Water Pledge, Residential Leak Detection and Repair, Rain Gauge and Landscape Watering, and Rain Barrel Usage. A tour of the DuPage Pumping Station and the LEED certified generator building also took place so the teachers could get a better understand of how a pumping station works and see the improvements made to the building.

The promotional materials that DWC hands out at events were given to the teachers to use in their classrooms to promote water conservation. These items included: shower timers, rain gauges, leak detection tablets, magnets, and educational handouts. DWC’s full rain barrel display and dual flush toilet display were both present.
