Generator Supply Contract

Contractor submittals are being reviewed.

Contract PSC-4 Lexington Pump Station Electrical Generation / Variable Frequency Drives

Contract VA-1

The bid opening for Replacement of Valve Actuators was due on November 27th. The Commission received a single proposal which was rejected. The project will be rebid with a bid opening date of December 16th.

GIS

Staff is working on a plan for the Commission's GIS program in calendar year 2009. Applications under consideration for development include a pipeline profile tool for the GIS web site that shows pipeline elevations and depth of pipe relative to the surface, a 3 dimensional model of the pipeline system and an external secure GIS web site for contractor use. Consideration is being given to the need for additional GPS data collection where gaps in coverage exist to improve the

overall accuracy of the pipeline maps. This could be done in-house or by contract with a licensed professional surveyor.

Migration to ESRI's ArcGIS Server from ArcIMS as the Commission's Internet mapping software is under consideration. ArcGIS Server offers faster mapping and is more easily customizable than ArcIMS. As such, it is the product slated to be ESRI's on line mapping program for the long term.
